

## Application Manual

### What you'll get in this box:

- 1x** 50ml OSREN Coatz 02 Absolute Metal Coating
- 1x** Cotton coating applicator kit
- 1x** Application manual

*If any of the above items are missing, please contact your local distributor for more information.*

### STEP 1 : PREPARATION

- A.** Wash and clay the surface to remove above surface contaminants.

- B.** If the surface is tarnished, polish with OSREN COATZ 02A Metal Polish Abrasive to remove oxidation, water spotting and surface rust.

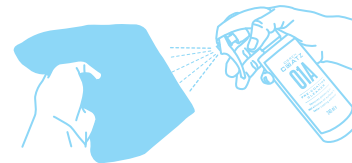

- C.** Buff off any polish residue with an OSREN Buffing Microfibre Towel.

- D.** Use OSREN COATZ 01A Pre-Coating Cleaner to remove any polishing oils and to ensure the best possible bond and durability of OSREN COATZ 02 Absolute Metal Coating.

- E.** Mist OSREN COATZ 01A Pre-Coating Cleaner onto surface and OSREN Buffing Microfibre Towel.

- F.** Spread and buff to clear.

## STEP 2 : APPLICATION

- A.** Wear gloves before application.

- B.** Soak the included cotton applicator with several drops of OSREN COATZ 02 Absolute Metal Coating.

- C.** Spread the coating onto the surface. Wait for 1-3 minutes before buffing. This varies depending on temperature. The higher the temperature, the sooner you have to buff.

- D.** Use an OSREN Buffing Microfibre Towel to lightly spread and even out the applied coating.

- E.** Use a fresh side of the towel to buff off to a clear high gloss shine.

- F.** Check surrounding areas for over application and buff off immediately if there's any.

## CURING PERIOD

- A.** Keep the applied surface from any contact of water for at least 24 hours.

- B.** Additional coats can be applied after curing at room temperature in 1 hour or after 20 minutes curing with an infrared lamp.

- C.** Full curing is achieved in 5 days. Refrain from washing with detergents within this period.

## ABSOLUTENESS AWAITS....

The car thanks you for you are about to install the absolute enhancement!

Just follow this application manual step by step and the coating process will be a breeze.
